

Ashwin Badhiye

AI & Software Engineer

ashwinbadhiye@gmail.com | +91 91681 48903 | Nagpur, Maharashtra | ashwinbadhiye.github.io/portfolio

PROFESSIONAL SUMMARY

Product-focused developer who designs, architects, and ships full applications end to end using AI-assisted development. Strong in problem solving, product strategy and direction, UX and workflow design, and system architecture, backed by solid computer-science fundamentals (data structures, algorithms, OOP) and prior hands-on backend and full-stack experience. Specializes in turning real business problems into working AI products by integrating LLMs (OpenAI), Retrieval-Augmented Generation (RAG), and automation. Has delivered multiple production SaaS platforms and Manifest AI, a cross-platform mobile app published under his name on the Apple App Store and Google Play.

SKILLS

Core Strengths	Problem Solving, Product Strategy & Direction, System & Workflow Design, UX/UI Design, Requirement Analysis, Team Leadership
AI Development	AI-Assisted Development (Cursor, Claude, ChatGPT, GitHub Copilot), AI System Design, Multi-Agent Architecture, Prompt Engineering, LLM / OpenAI Integration, Retrieval-Augmented Generation (RAG), Document Grounding, Vector Databases, AI Agents & Automation
Foundations	Data Structures & Algorithms, Object-Oriented Programming, REST API Design, Relational Databases (SQL)
Product Stack	React, Next.js, React Native, Node.js, Python / FastAPI, PostgreSQL, MySQL, Prisma, Tailwind CSS
CMS & Tools	WordPress, WooCommerce, Elementor, Git, GitHub Actions (CI/CD), Firebase, Netlify, Figma

WORK EXPERIENCE

Freelance, Independent AI Product Developer	Oct 2025 – Present · Nagpur
- Design, build, and publish AI-powered products end to end using AI-assisted development, owning product direction, UX, architecture, data modeling, and release. - Built and shipped Manifest AI: Vision into Life, a cross-platform iOS & Android app published under my name on the Apple App Store and Google Play, with goal setting, AI-generated manifestation scripts and affirmations, guided audio sessions, private journaling, vision boards, daily whispers, and streaks. - Delivered products across diverse industries including finance and accounting, manufacturing and field service, retail, and consumer wellness. - Integrated third-party platforms across products: OpenAI for AI generation, Firebase for authentication and real-time data, RevenueCat for subscriptions and in-app purchases, and AdMob for monetization. - Turn real business problems into working products by breaking them into clear technical workflows and directing AI coding tools while owning architecture, quality, and user experience.	
Oriens DevSecOps, Software Developer	Dec 2023 – Oct 2025 · Nagpur
Backend Development: POSA Salud (Mobile POS, live on the App Store and Google Play)	
- Built backend services and REST APIs connecting a legacy Windows POS with the POSA Salud mobile app for sales, inventory, and vendor management. - Engineered full two-way synchronization in Python between an offline DBF desktop system and a cloud MySQL database, covering every offline, reconnect, and conflict scenario. - Integrated Global Payments for both physical card-reader and online card payments across the POS ecosystem. - Integrated third-party platforms such as DoorDash to extend POS functionality for online ordering and delivery. - Created a custom Windows installer to automate desktop setup, database syncing, and troubleshooting across multiple retail stores, and optimized queries and error handling for multi-store reliability.	
WordPress & WooCommerce Development	
- Designed and delivered 15+ responsive WordPress and WooCommerce websites using Elementor, WPBakery, and Gutenberg. - Customized themes and plugins and integrated third-party tools including payment gateways and CRM systems. - Implemented SEO strategies, performance optimizations, and mobile-first, cross-browser compatibility, with ongoing maintenance.	
Culturelligence, Web Developer	Jun 2023 – Nov 2023 · Remote
- Designed and updated website content, managed events, and customized layouts using Elementor, MemberPress, and EventPress. - Collaborated with cross-functional teams to maintain consistent design while deepening expertise in WordPress CMS and plugin customization.	

KEY PROJECTS

Manifest AI: Vision into Life (iOS & Android App)

[Website](#) · [App Store](#)

- Flagship product. A manifestation app that turns user goals and journals into personalized AI-generated scripts, affirmations, and calming audio sessions, published under my name on the Apple App Store and Google Play.
- Implemented goal setting, private journaling, AI script & affirmation generation, guided audio, vision boards, daily whispers and streaks, subscriptions, and ads.
- Owned the product end to end, from concept, UX, and AI pipeline design through store submission and release on iOS and Android.
- *React Native, OpenAI, Firebase, RevenueCat, AdMob, Google Cloud.*

POSA Salud: Mobile POS App (iOS & Android)

[Website](#) · [App Store](#) · [Google Play](#)

- Mobile point-of-sale for iPhone, iPad, and Android. As the backend developer, built the REST APIs and the full offline-to-cloud two-way sync between a legacy Windows (DBF) desktop POS and a cloud MySQL database, covering every offline, reconnect, and conflict scenario.
- Integrated Global Payments for physical card-reader and online card payments, and DoorDash for online ordering; live on the App Store and Google Play.
- *Python, MySQL, REST APIs, Two-way Sync, Global Payments.*

Zoo Intelligence: AI Animal-Health Monitoring Platform

[Live](#)

- Built a multilingual system where keepers log care notes in any language; AI structures the data, builds per-animal timelines, raises upcoming-care alerts, and powers a multi-agent chatbot and a document-grounded, RAG-based symptom analyzer.
- Cut hours of manual record-keeping by auto-structuring free-text notes and proactively flagging upcoming vaccinations, deworming, and health checks.
- *Next.js, TypeScript, OpenAI, Multi-Agent Architecture, Document Grounding, Vector Search (RAG).*

Service Intelligence Layer: Enterprise Service & Maintenance SaaS

[Live](#)

- Built a production SaaS with four role-based (RBAC) dashboards, machine-lifecycle tracking, multi-agent AI insights for predictive maintenance, and inventory/revenue-leakage analytics.
- Gave the manufacturer a national control tower over dealers, machine health, service compliance, spare-parts demand, and missed-service revenue.
- *Next.js, React, TypeScript, Prisma, Multi-Agent Architecture, Vector DB, Recharts.*

CA AI: AI Vouching & GST-Compliance Engine

[Live](#)

- Built an AI platform for chartered accountants automating invoice extraction, GSTR-1/3B/2B reconciliation, tax-notice response drafting, and audit documentation across thousands of invoices.
- Turned days of manual vouching into an automated, auditable pipeline, letting CAs focus on judgment instead of data entry.
- *Next.js, React, TypeScript, FastAPI, Python, PostgreSQL, OpenAI.*

ExcelDash: AI Spreadsheet-to-Dashboard Analytics

[Live](#)

- Built a tool that converts raw Excel/CSV data into interactive KPI dashboards, with an AI insights mode for trends and a built-in data chatbot for natural-language queries.
- Standard mode delivered instant KPIs and charts; AI mode added deeper trends, a strategic summary, and a one-click shareable Data Dossier.
- *Next.js, React, TypeScript, OpenAI, Recharts.*

Websites: 15+ Delivered Across the US, UK & India

Oriens & Freelance

- Designed and delivered 15+ responsive websites for international clients across the US, UK, and India, spanning retail and point-of-sale, industrial and fire safety, construction materials, religious and community organizations, sports, IT services, and SaaS.
- Built on WordPress, WooCommerce, Elementor, WPBakery, and Gutenberg as well as custom React/Next.js, with integrations including Global Payments donations, Zoho live-chat, payment gateways, CRM and membership systems, and SEO and performance optimization.
- *WordPress, WooCommerce, Elementor, WPBakery, React, Next.js, Tailwind CSS, PHP, Zoho, Global Payments.*

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC), CDAC ACTS, Pune

2023

Grade A, 77.50% · CCAT Rank: All India Rank 17

Bachelor of Engineering (Mechanical), G. H. Raison College of Engineering, Nagpur

2014 – 2018

CGPA 7.51

LANGUAGES

English · Hindi · Marathi

SOFT SKILLS

Communication · Leadership · Teamwork · Problem Solving
