

Ashwin Badhiye

AI & Software Engineer

ashwinbadhiye@gmail.com | +91 91681 48903 | Nagpur, Maharashtra | ashwinbadhiye.in | github.com/ashwinbadhiye

PROFESSIONAL SUMMARY

Product-focused developer who designs, architects, and ships full applications end to end using AI-assisted development. Strong in problem solving, product strategy and direction, UX and workflow design, and system architecture, backed by solid computer-science fundamentals (data structures, algorithms, OOP) and prior hands-on backend and full-stack experience. Specializes in turning real business problems into working AI products — integrating LLMs (OpenAI), Retrieval-Augmented Generation (RAG), and automation — and has delivered multiple production SaaS platforms and Manifest AI, a cross-platform mobile app published under his name on the Apple App Store and Google Play.

SKILLS

Core Strengths	Problem Solving, Product Strategy & Direction, System & Workflow Design, UX/UI Design, Requirement Analysis, Team Leadership
AI Development	AI-Assisted Development (Cursor, Claude, ChatGPT, GitHub Copilot), Prompt Engineering, LLM / OpenAI Integration, Retrieval-Augmented Generation (RAG), Vector Databases, AI Agents & Automation
Foundations	Data Structures & Algorithms, Object-Oriented Programming, REST API Design, Relational Databases (SQL)
Product Stack	React, Next.js, React Native, Node.js, Python / FastAPI, PostgreSQL, MySQL, Prisma, Tailwind CSS
CMS & Tools	WordPress, WooCommerce, Elementor, Git, GitHub Actions (CI/CD), Firebase, Netlify, Figma

WORK EXPERIENCE

Freelance — Independent AI Product Developer Oct 2025 – Present · Nagpur

- Design, build, and publish AI-powered products end to end using AI-assisted development — owning product direction, UX, architecture, data modeling, and release.
- Built and shipped **Manifest AI: Vision into Life**, a cross-platform iOS & Android app published under my name on the Apple App Store and Google Play — implemented goal setting, AI-generated manifestation scripts and affirmations, guided audio sessions, private journaling, vision boards, daily whispers, and streaks.
- Integrated third-party platforms across products: OpenAI for AI generation, Firebase for authentication and real-time data, RevenueCat for subscriptions and in-app purchases, and AdMob for monetization.
- Turn real business problems into working products by breaking them into clear technical workflows and directing AI coding tools while owning architecture, quality, and user experience.

Oriens DevSecOps — Software Developer Dec 2023 – Oct 2025 · Nagpur

Backend Development — POSA Salud (Mobile POS for Retail)

- Built backend services connecting a legacy Windows POS system with a new mobile app for sales, inventory, and vendor management.
- Developed RESTful APIs in Java and Python for two-way synchronization between DBF and MySQL databases, ensuring real-time consistency.
- Integrated third-party platforms such as DoorDash to extend POS functionality for online ordering and delivery.
- Created a custom Windows installer to automate desktop setup, database syncing, and troubleshooting across multiple retail stores.
- Optimized database queries and error handling, improving performance, reliability, and scalability for multi-store operations.

WordPress & WooCommerce Development

- Designed and delivered 15+ responsive WordPress and WooCommerce websites using Elementor, WPBakery, and Gutenberg.
- Customized themes and plugins and integrated third-party tools including payment gateways and CRM systems.
- Implemented SEO strategies, performance optimizations, and mobile-first, cross-browser compatibility, with ongoing maintenance.

- Designed and updated website content, managed events, and customized layouts using Elementor, MemberPress, and EventPress.
- Collaborated with cross-functional teams to maintain consistent design while deepening expertise in WordPress CMS and plugin customization.

KEY PROJECTS

Manifest AI: Vision into Life — iOS & Android App

Website · App Store

- Flagship product — a manifestation app that turns user goals and journals into personalized AI-generated scripts, affirmations, and calming audio sessions; published under my name on the Apple App Store and Google Play.
- Implemented goal setting, private journaling, AI script & affirmation generation, guided audio, vision boards, daily whispers and streaks, subscriptions, and ads.
- *React Native, OpenAI, Firebase, RevenueCat, AdMob, Google Cloud.*

Zoo Intelligence — AI Animal-Health Monitoring Platform

Live

- Built a multilingual system where keepers log care notes in any language; AI structures the data, builds per-animal timelines, raises upcoming-care alerts, and powers a chatbot and a RAG-based symptom analyzer.
- *Next.js, TypeScript, OpenAI, Hugging Face embeddings, Vector Search (RAG).*

Service Intelligence Layer — Enterprise Service & Maintenance SaaS

Live

- Built a production SaaS with four role-based (RBAC) dashboards, machine-lifecycle tracking, predictive-maintenance insights, and inventory/revenue-leakage analytics.
- *Next.js, React, TypeScript, Prisma, SQLite, NextAuth.js, Recharts.*

CA AI — AI Vouching & GST-Compliance Engine

Live

- Built an AI platform for chartered accountants automating invoice extraction, GSTR-1/3B/2B reconciliation, tax-notice response drafting, and audit documentation across thousands of invoices.
- *Next.js, React, TypeScript, FastAPI, Python, PostgreSQL, OpenAI.*

ExcelDash — AI Spreadsheet-to-Dashboard Analytics

Live

- Built a tool that converts raw Excel/CSV data into interactive KPI dashboards, with an AI insights mode for trends and a built-in data chatbot for natural-language queries.
- *Next.js, React, TypeScript, OpenAI, Recharts.*

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC) — CDAC ACTS, Pune

2023

Grade A, 77.50% · CCAT Rank: All India Rank 17

Bachelor of Engineering, Mechanical — G. H. Rasoni College of Engineering, Nagpur

2014 – 2018

CGPA 7.51

LANGUAGES

English · Hindi · Marathi

SOFT SKILLS

Communication · Leadership · Teamwork · Problem Solving
